

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

W SW

Build empathy

The information you add here should be representative of the observations and research you've done about your users.

Says

What have we heard them say?
What can we magine them saying?

Calculation or prediction of some future events.

An estimate of future population is necessary for desinging various facilities

Many governments periodically make population projections for their own countries

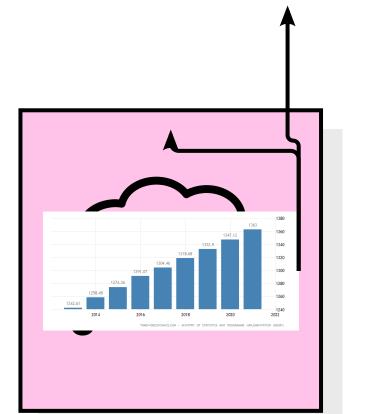

Population forecasting is a method to predict the future population of an area.

It gives a picture of what the future size and structure of the population by sex and age might look like.

Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

Mathematical method is frequently used for the estimation of formation

Logistic curve method is

best for

population

forecasting

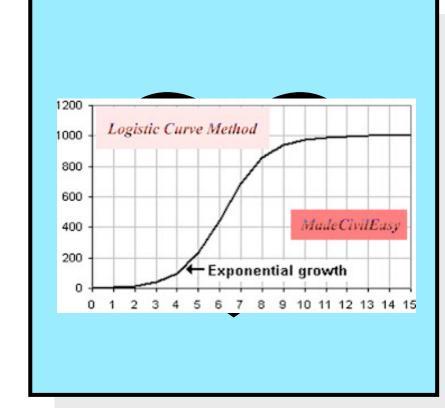

Indian population is set to rise to 1.515 billion in 2030 from 1.417 billion in 2022

Some of the biggest factors that influence forecaste are TIME AND DATA.

Does

What behavior have we observed? What can we imagine them doing?

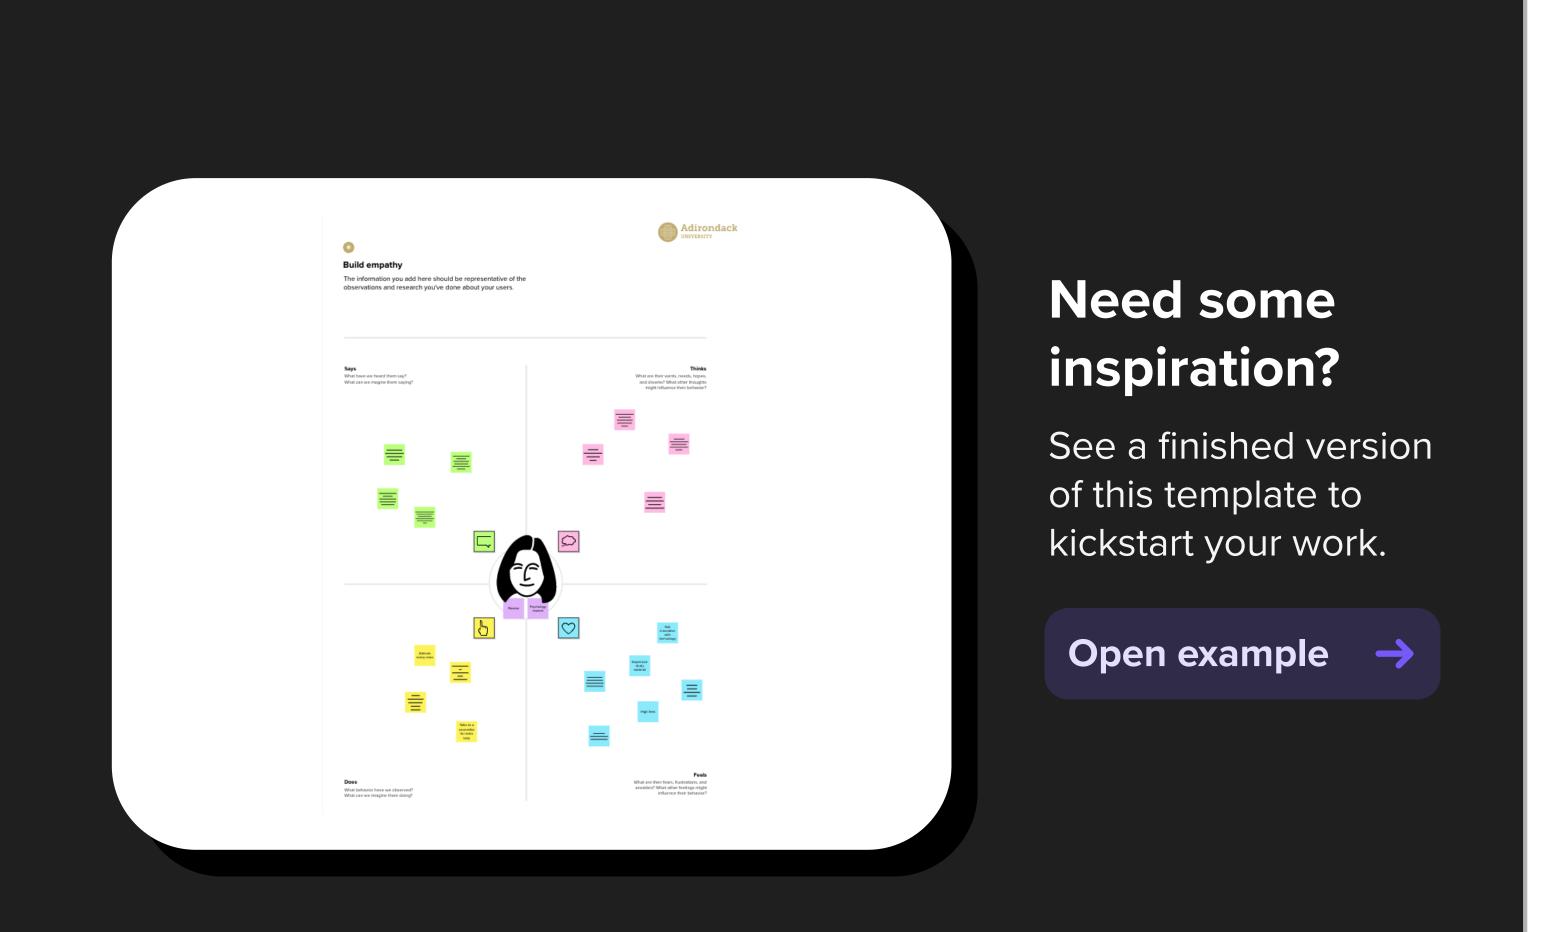

Population of last few decades are correctly plotted to a suitable scale on graph

The population curve is smoothly extended for getting future population.

This extension should be done carefully and requires proper experiences and judgement.

Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?
